Mantenimiento bastidor

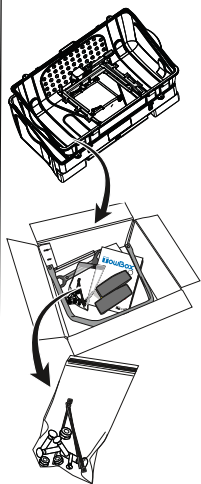

Debe proteger su Towbox con una placa anticorrosiva si el humo procedente del tubo de escape de su coche va directamente a la caja.
You should protect your towbox with a heatproof plate if the smoke from the exhaust system of your car is going directly to the Towbox.
Si votre TOWBOX est trop près de votre pot d'échappement, vous devez installer une plaque anti-chaud pour protéger votre coffre.
Eventualmente proteggere il TOWBOX con un piastra resistente al calore se il fumo del tubo di scarico del veicolo si trova troppo vicino al baule.
Sollte die Towbox mit einem hitzebeständigen Platte geschützt werden, wenn die Abgase des Autos direkt auf die Tow box gelangen.
